## Programs of Study in Fields Eligible for the International Post-Graduate and Express Entry BC International Post-Graduate Categories

The tables below identify programs of study within the natural, health and applied sciences fields that are eligible for consideration under the International Post-Graduate categories of the BC PNP.

Further details regarding the classification of these programs of study can be found on Statistics Canada's [Classification of Instructional Programs \(CIP\)](#) website. Please note that the lists below are subject to change.

Completing a program on this list does not guarantee a nomination under the International Post-Graduate categories. Inclusion on this list only means that a program is in an eligible field of study and is (or has been) offered by an authorized British Columbia institution. Your program must also meet all other requirements of the International Post-Graduate categories as listed in the [BC PNP Skills Immigration and Express Entry BC Program Guide](#). For example, your education will not be eligible if it is a "distance education learning program." A distance education learning program means a program of study in which the majority of the credits earned by the student toward the completion of a program of study were earned by completing online courses.

Prospective students should also note that inclusion on this list does not necessarily mean that a program is currently offered. To confirm the current status of a program, consult the post-secondary institution that offers it.

### Private post-secondary institutions

If your program of study from a private post-secondary institution is not listed in the table below, it is not eligible for the BC PNP's International Post-Graduate categories. You may be eligible for the International Graduate categories.
